## KEY FEATURES

- + Play as an apex predator AKA a lion.
- + Funniest part of the game is the Advanced AI system with real-time Predator-Prey simulation. Unarmed preys will try to run for their lives, armed hunters will try to hunt you down. Although getting them scared will make it easy to hunt them. Various scaring tactics can be used (ex. Attack from hidden corners or behind, jump scare them, roar at them, eat someone in front of them etc)
  - + Kill various species depending on your own humanitarian or animal loving bias.
  - + There are hipsters, rednecks, donut loving cops, cosplayers and even console peasants in the city.
    - + Live tweets from your poor, whining victims
  - + After hunting your prey, eat them and listen to the sweet bone crushing musical notes. It never gets old.
- + Defcon levels work like wanted levels in any open world game. The higher you get, the more bonuses you get but the game becomes more difficult.
  - + Tons of characters to unlock as you play. Bigger rewards for hunting down higher level victims.
- + Powerful roar to scare everyone around you. Once you become a true Lion born by acquiring the glorious Fus-Roar-Duh skill, roars become lethal.
  - + Xbox Controller support.

The idea is pretty interesting, but it has a few bugs that break the game that made me give up after my second ending:

- Once the judge appeared and pushed me onto a table which rendered me unable to move
- Once the game froze while the judge appeared
- Once, after my lawyer explained one of the evidences found, and I was supposed to resume my testimony, instead I appeared in my cell without being able to interact with anything. I couldn't even summon the menu.

Aside from those:

- The game really needs an option to "wait X minutes" without the need to do an activity. Or at the very least, have more activities and in more places.
- There should be an option to skip a single line of dialog during the courtroom scenes
- You have no way of knowing how most of your actions will affect your testimony, so you basically have to go by trial and error, which makes a victory feel like it's not an accomplishment. Less than bargain bin quality. Blank black screen at startup.

No support.

Had to stare at the blank black screen for five minutes before being able to write a review on the blank black screen.

All around a super enjoyable experience.. I am reviewing this game to make a few points.

First, I want to support this team due to the fact that they made a game with a small budget, team, and took the time to release a product that was ready to release, and NOT in EARLY ACCESS.

I have experienced no bugs so far.

Second, the evolution of VR is shifting in a way that promotes the idea of a "full" game. Technology and gameplay are moving away from wave based/standing still "arcadey" foundations, to more story driven and expansive foundations. Yes this game would be better if it was longer, had more mechanics (ie repairing, feeding horses, smithing) implemented throughout the game more freely, and had more realistic combat. However, this game does create the possibility of this being implemented in games in the future. Imagine a game like Kingdom Come in VR(the good aspects at least)

\$25 for roughly 4 hours of entertainment breaks down into \$6.25 an hour. If you are ok with that, I'd say it's worth it to support the game, and then go back to the 20+ hours you have in Gorn etc etc..

I personally like the fact that you can explore the rooms and open drawers and climb around, that is appealing. It is not implemented throughout, but it brings attention to how cool VR could be with the correct resources. It's a cool game, I've spent 25\$ on much worse.. The game is ok .... I just have no diamonds :( **This game fails at everything it tries to do except keep track of a few numbers...**

- The resolution of the images and the text sizes are inconsistent and disgusting to look at. (A six year old could easily do a better job with graphics.)
- The buy menus make no sense. "10 20 Achievement producing 150 cookies per second"
- Settings for sound don't stay after restarting the game.
- The music loop isn't even looped right.
- The sound for not having enough to buy what you clicked on is earrape.

- 
- The game is super unbalanced.
  - It has a DLC that is useless.
  - Stupid achievement spamming.
  - The achievements labled "Another second in the game" mean "Another click in the game"
  - Playing the games at different resolutions breaks scaling.

Don't buy it. It's a stupid cash grab.. A classic, with unique gameplay and exciting action packed engagements.

An interesting puzzle game that rapidly moves from taking a few seconds, to a few minutes, to half an hour or more to solve the increasingly tricky levels. Gorgeous artwork and lovely soundtrack. If you're a big puzzle fan then She Remembered Caterpillars is worth a look.. Improves upon its predecessor in many ways, a pretty worthy sequel. Be warned though, the 3D engine is quite buggy. Save often, as you might find yourself walking through walls or falling straight through the ground if you jump too vivaciously.. Cool idea, unfortunately abandonware. Burned by EA again.. Good game! Doesn't include kingdom of the crystal skull, which is a bummer, but hey, that movie gets plenty of attention in the second game. Its fun and engaging, with lots of characters to collect, and the hub world (the university Indy works at) is actually quite big, and actually takes a bit of time to explore. I'd recommend it to anyone who likes Indiana Jones.. Don't let the videos and screenshots fool you. This is not what it looks like. It is a RTS through and through. Not your run-of-the-mill one mind you. I'm pretty sure there are way more detailed reviews out there so I'm only going to a broad stroke.

My main beef with the game is the accessibility curve is really steep. If you don't get put off by the terrible UI, the lack of \*proper\* tutorials what you will get is a gem of a game. Start with a premade game in skirmish mode, learn how the units work together (never leave a command vehicle undefended, don't send your units ahead of your recon units), master them then challenge yourself in the campaign playing in varying conditions with decks of varying effectiveness.

The deck building of the game leave you in control and let you bring your tailor-made army; hundred of cheap and antique tanks to swarm your enemy with, countless artillery and missile launcher batteries (no don't do this).

This is a very good game, certainly rough around the edge, but if you are a RTS fan, one you definitely have to try.
