1/5 stars. Let me explained why I think this game is bad and does not deserve your money:

- 1) This game have 3 "mode". One of them is "Free play". You would think that free play mean the player can set the rule. LOL NOPE! You are restricted to maximum 4 points in the beginning. You want to set 3 points to max? You need to "unlock" these by playing "Champion" and "PVP" mode. Which brings to the next point:
- 2) "Champion" mode is totally lame. Is like a single player game where you go around and beat like 9 bosses. But the AI for these bosses seem to be the same. So what makes a boss "difficult" ? They set victory condition rather than out right win the most money. So for example, one of the boss, you "win" by winning 3 rounds of self draw. If you cant do that in 30 minutes, you "loss". What makes it worst is that for each bosses, you also need to earn "key" to challenge them. The first boss and the last 2 boss have no keys. To earn keys, you have to play against previous boss over and over to earn keys. Keys are given randomly when you win a round. But usually only if you score low points round. Funny thing about this lame system, I won a round with 13 aunts 15 points. This bankrupted one of the AI and the match is over. You still have to come back again if you want to beat that same boss, because I didn't "win" by condition. Lame and a waste of time.
- 3) "PVP" mode. Is not pvp. You don't play against other players online. You just play against AI and win experience instead of money. You can then earn "coins" which is then used to unlock things like unlocking free mode condition or different colour tiles. Oh did I mention that you need to earn "gold" to challenge AI for experience? LOL what kind of lame design is this?
- 4) English translation is a nightmare. Is not even on par with an elementary ESL student.
- 5) There no rules or tutorials, so you have to google if you don't know how to play
- 6) Bad resolution. Which usually doesn't matter too much for indie games, but it does here. This is because you cant read the Enemy flower tiles due to bad resolution.
- 7) Bad game speed. Too much animation for a card game. I don't need to see a tile get discarded. I would like to set the animation off so that I can only focus on the game itself.
- 8) Tick tack toe in champion mode is unskippable. Another lame design.
- 9) NO real PVP, no online mode. Lame

#### Conclusion:

There are many game developers these days for traditional mah-jong game. I do not feel this one lived up to my expectation. It feel like a really annoying RPG game, with very little reward. Free play mode should be unlocked at start.

Not worth it IMO.

. This game is broken, at least under the Taiwanese ruleset - it sometimes doesn't notice that a hand is winning.. One of the few real Mahjong games around.. A clean and intuitive interface!

Easy of use!

Any serious mahjong player will love this game.

Hours of fun for friends and family.

Can play against computers. They are good!

Highly recommended.. A challenging real Mahjong game with walls. The bots you play against are good.
